

INTUISKIN GETS ITS FIRST CE MARKING

Nemko certification awarded to IntuiSkin first product range

Grenoble, France and Durham, North Carolina, October 3, 2006 – MEMSCAP (Euronext: MEMS), the leading provider of innovative solutions based on MEMS (micro-electro-mechanical systems) technology, today announces that its subsidiary IntuiSkin, the Skin technology specialist, has been granted the very popular Nemko certification for its first range of professional products.

Independent institution established in 1933, Nemko ensure the conformity of products to European standards, including the 73/23, 93/68 and 89/336 directives. The certification, which was for IntuiSkin the ultimate step before the launch of volume production, is specific to high-end systems with complex functionalities. It now enables IntuiSkin to mark its product range commercialised on the European market, with the CE label.

Based on the verification of many parameters throughout the production and management chain, IntuiSkin certification, which complies with the quality management system, was obtained after long and thorough audits. This implies traditional requirements for quality management such as design, development, manufacturing, installation and maintenance of systems, but also more specific ones such as design controls, process controls (including environmental controls), special processes, traceability, record retention, and regulatory actions.

Specialised in innovative systems, products and services dedicated to the Skin, IntuiSkin has, since inception, benefited from the vast experience and specialized expertise of the MEMSCAP Group R&D. Its innovative solutions in the field of Skin biometry and analysis are protected by international patents, and cater for the needs of all markets dedicated to the skin care, from dermatologists to large consumer. IntuiSkin systems give professionals (dermatologists or cosmetic companies) the tools for a better efficiency, as well as for the recommendation of products that are best suited for each skin type and lead to the satisfaction of the patient/customer.

Nemko certification is critical for the medical device industry but rarely obtained in the dermatology/cosmetic industry. Because of its unmatched experience in the medical and aeronautics fields, this was, however, a natural move for MEMSCAP. Getting the CE marking is an integral part of the MEMSCAP Group dedication to quality and customer satisfaction throughout the world.

About MEMSCAP

MEMSCAP is the leading provider of innovative micro-electro-mechanical systems (MEMS)-based solutions. MEMSCAP standard and custom products and solutions include components, component designs (IP), manufacturing and related services. MEMSCAP customers include Fortune 500 businesses, major research institutes and universities. The company's shares are traded on the Eurolist of Euronext Paris S.A (ISIN: FR0010298620-MEMS), where MEMSCAP belongs to the Next Economy segment. More information on the company's products and services can be obtained at www.memscap.com.

About IntuiSkin

IntuiSkin is a fully owned subsidiary of the MEMSCAP Group. It is the provider of innovative Skin dedicated systems, products and services for a wide variety of applications and fields. Leveraging on the Group expertise, experience, vast patent portfolio, and years of research dedicated by its teams, as well as on the validation of its Products by the Scientific and cosmetic most renowned names, it has developed and created a unique technology that puts Science at the service of your Skin. IntuiSkin provides each skin with tomorrow's products, in order to cater for its specific needs. For more information, <http://www.memscap.com>, section IntuiSkin.
